HAWLE.**MAP**

Direct access to important information such as condition, GPS location and detailed inspection reports on the maintenance work carried out on hydrants, pressure reducing valves, gate valves and air release valves.
In addition, all leakage reports are also displayed in the HAWLE.**MAP.**

- **Optimal use** for all end devices
- **Same database** for municipality, water authorities and fire brigade
- **Extendet** analysis
- Documentation of the **extinguishing water supply** (civil protection)
- **Additional user accounts** for employees, companies or fire brigade with individual authorisations
- **Data export** for all products installed in the entire water network.
- Display of **air release valves and leakage reports**

Features

- Free demo at map.hawle-service.at
- Unlimited access for customers with silver and gold package
- Different map views (Streets, Street View, Satellite, Topography, OpenStreetMap)
- Deployable radius & designer-symbols visible
- Inspection and maintenance reports visible
- No software installation required

Download now!

- HAWLE.**MAP** App für Android & iOS
- Assistent for **calculations** (basic design for pressure reducing valves, pressure lost in pipelines) and **technical information** (flange dimensions, pipe dimensions, Synoflex, required bolt lengths, spindle turns, tightening torque, ...)
