## ... to the world of Hawle

### **A family company with a proud tradition and an eye on the future.**

Hawle, a purely family-owned company founded in 1948 is the worldwide leader in the production of an extensive product range of valves and connecting pieces. Hawle is an innovation leader in the development of high-quality valve solutions. In compliance with European and additionally applicable standards, Hawle produces high-performance and durable quality fittings for the construction and the use of water pipelines, as well as the necessary accessories and the required equipment.

Our specialist area of water and wastewater systems also includes customised fittings for special applications and special conditions.

An excellent understanding of the manufacturing process and the production requirements, extensive knowledge in water supply, years of experience and a broad service program enables us to create the optimum product for pipeline connections in all areas of international water supply.

The unique 10 year quality guarantee for Hawle products in the drinking water area confirms our leading position for innovation and quality.

The employees of our company, which has its registered office in Vöcklabruck (Austria), bring all their service and subject knowledge into the research, design, development as well as the production process.

Hawle products are exclusively produced in Europe in the most up-to-date production facilities. More than 98% of the raw materials used in the products come from Europe. Hawle products are manufactured by well-trained specialists, thus guaranteeing careful monitoring of the quality in each phase of the production process. The majority of the components are also produced by Hawle. So the functionality and the quality is assured and guaranteed in each production step.

Hawle stands for high quality, efficiency and durability. Therefore international customers trust in our products and technologies - for generations.

For more details go to **[hawle.com](http://hawle.com)**

# Hawle - the best solution

## a reliable partner

### 100% Hawle, 100% proven quality

We are constantly striving for improvements together with our partner companies all over the world. In order to achieve this we focus on the requirements of our customers, invest in the most up-to-date technology and offer professional service and technical support.

Hawle has an excellent network of partners, which ensures an efficient and competent distribution of all our products. Our central warehouse in Frankenmarkt, Austria, supplies this network with numerous finished products, which are stored in over 10,000 pallet spaces.

The pipe connections which our technicians develop today will be used tomorrow for your secured water supply.

Hawle offers a competent, round-the-clock service. As soon as we receive your call we immediately put all our efforts into finding a solution to your problem.

made for generations.

# Hawle - High Level of Safety

technically and economically

## Definition of wastewater:

The products listed in the catalogue are intended for stationary installation in wastewater pipelines made from PE, PVC, DCI, steel or AC pipes. Municipal wastewater is defined according to EN 1085. Limit values for wastewater: min. 8.0°dH total hardness, pH value of at least 5 to max. 9.5.

In case of other usage or environmental conditions please let us know about the specific operating conditions with your first query. Our application engineering department will gladly support you with questions about the suitability of products for certain operating conditions.

If our fittings are used outside of the standard applications and without approval of the specific operating conditions by our application technology team we cannot accept any liability.

In such a sensitive area, particular care is naturally given to the **product quality**, the **durability** and the **functional safety** of the products.

# Hawle - Guarantee and warranty

## 5-years quality guarantee (municipal waste water)

E. Hawle Armaturenwerke GmbH (hereinafter referred to as "Hawle") guarantees the function of all valves and fittings manufactured by Hawle with the original "Hawle" inscription, which are used for municipal wastewater as intended in accordance with EN 1085, for a period of 5 (five) years from the date of delivery from our works. However, the maximum guarantee period afforded by Hawle is 6 (six) years from the manufacturing date of the product. In the event of a guarantee claim, it is the responsibility of the customer to prove that the guarantee has not expired, e.g. by presenting the invoice or the original product label.

Should a valve or fitting cease to function during the guarantee period, Hawle shall at its discretion, either repair the product or deliver an equivalent replacement product to the place of performance agreed with Hawle. Hawle will not assume any additional costs or damages incurred by the customer or third parties within the scope of this guarantee. In particular any costs incurred by disassembly, installation, localization or reinstallation shall not be covered by Hawle. Purely optical flaws that in no way impair tightness, tensile strength, nor the operation of the valve or fitting, do not constitute a guarantee claim.

The guarantee also excludes, but is not limited to, wear parts and damage caused by improper storage, transport and assembly, non-compliance with instructions for use, failure to perform pressure tests, utilisation outside the limits of standard applications and general operating parameters, inadequate maintenance, subsequent manipulation or utilisation with unsuitable liquids or gases. The guarantee does not extend to exceptional environmental conditions, vibrations or residues from the medium or similar external influences, including third-party actions, accidents and other events over which Hawle has no influence.

Please also note the exceptions and special regulations applicable to certain products in our catalogue and on our homepage [www.hawle.at](http://www.hawle.at).

This guarantee is subject exclusively to Austrian law under the exclusion of international conflict of law rules. Any warranty claims arising from the contract of sale shall not be limited by this guarantee.

This guarantee applies to all deliveries as of 01.01.2019 of valves and fittings manufactured by Hawle, which are used as intended for municipal wastewater according to EN1085. Any guarantees or warranties issued by Hawle prior to this effective date shall not be valid for any deliveries made thereafter.

## 2-year warranty

In addition to our quality guarantees, Hawle warrants in accordance with Austrian law that our products correspond to the relevant contract at the time of delivery. In the event of incorrect storage, transport, assembly, descriptions for use not being observed, failure to pressure-test, insufficient maintenance, subsequent manipulation or usage for non-suitable fluids or gases there is not entitlement to warranty claims. The warranty period runs for a maximum of two years ex-works delivery. Please see the Hawle delivery conditions for further details of the warranty.

# Hawle - Standard- and special applications

## STANDARD APPLICATIONS:

Our products are intended for stationary installation in wastewater pipelines made of PE, PVC, DCi, steel or AC pipes.

## STANDARD MEDIUM:

- **Municipal wastewater**  
according to EN 1085

## GENERAL OPERATING PARAMETERS:

### Municipal wastewater:

Medium temperature: 0 °C to max. 40 °C  
max. 250 mg/l Chloride, max. 0.3 mg/l free chlorine  
min. 8.0°dH total hardness  
pH value of min. 5 to max. 9.5

For the specific operating parameters of our products, please refer to the respective product pages of our catalogue and our homepage **hawle.com**

## SPECIAL APPLICATIONS:

In case of deviating conditions of use or ambient conditions, please inform us right on your first inquiry about the specific operating conditions. If you have any questions regarding the suitability of products for certain operating conditions, please contact our Application Engineering department (phone: +43 (0) 7672 72576-0).

If our valves and fittings are used for other than the standard applications and without the approval granted by our Application Engineering department regarding the conditions of use, we cannot assume any liability.

## APPLICATION INSTRUCTIONS:

Valves and fittings should be stored in a cool, dry and low-dust environment protected from weather. Avoid exposure to direct sunlight or UV light, unless the valves and fittings are designed for use above ground. For the correct installation and maintenance of our valves and fittings, please observe our instructions as well as the pertinent European standards (EN), as well as the directives of the ÖVGW (the Austrian Association for Gas and Water) and/or comparable national technical standards.

# Hawle - Corrosion protection

High quality corrosion protection using the GSK fluidised bed Epoxy coating system.  
The environmental friendly solvent and pollution free powder coating technology!

## Epoxy Powder-Coated coating according to GSK:

- ⦿ Fulfils the requirements according to EN 14901 (pipes, fittings and accessories)
- ⦿ Minimum coated thickness 250 µm
- ⦿ Zero porosity
- ⦿ High adhesion to metal (min. 12 N/mm<sup>2</sup>)
- ⦿ High resilience (no cracking)
- ⦿ Smooth surface (makes incrustation more difficult)
- ⦿ Suitable for food use according to the guidelines for hygienic evaluation of organic coating in contact with drinking water (coating guideline) of the German Federal Health Office
- ⦿ High impact resistance
- ⦿ Bacteriological approval to DVGW recommendation W270
- ⦿ Regular quality tests according DIN 3476-1 - coating thickness, adhesion, spark-testing, impact resistance
- ⦿ Independant auditing of quality control systems by MPA Hannover in accordance with the test methods of **GSK** (Gütegemeinschaft Schwerer Korrosionsschutz - the association for high quality corrosion protection)
- ⦿ Hawle standard colour RAL 5012  
optional RAL 6037

# Wastewater - Knife Gate Valve With loose flange

No. 4806

## Design features

- The ideal gate valve for the replacement of existing valves and new construction of pressure lines
- Spindle lies outside the flow medium
- Reliable and leak-proof shut-off function by knife gate and O-ring seal
- Can be used for installation in plants and underground installation
- Restraint connection
- Bonnet can be replaced "under pressure" (up to DN 200)
- Flat gaskets are already contained in the conical seals

## Material | Technical features

- **All cast iron parts** made of ductile iron, epoxy powder coated
- **Spindle, knife gate** made of stainless steel
- Face-to-face length according to EN 558 GR 14
- Max. operating pressure MOP (PN) 10
- Note: actuation by means of electric actuator on request
- Flanges sized in accordance with EN 1092-2, drilled according to EN 1092-2 | PN 10 standard;  
EN 1092-2 | PN 16 DN 200 please specify on order - other standards on request

## Suitable accessories

Handwheel:		No. 7800 <sup>+</sup>
Extension spindles:	rigid	No. 9000E2/E3 <sup>++</sup>
	telescopic	No. 9500E2/E3 <sup>++</sup>

<sup>+</sup> check the spindle square „VK“

<sup>++</sup> note the footnote below the table

## Application example

DN	MOP (PN)	H	L	Ø d	VK	Weight
80	10	295	180	76	14,8*	14,00
100		320	190	96	14,8*	17,00
125		424	200	121	17,3**	27,00
150		410	210	145	17,3**	32,00
200		530	230	172	19,3***	45,90
250		832	250	247	27,3	150,00
300		807	270	297	27,3	178,00

\* When using an E2/E3 extension spindle (9000E2/E3 / 9500E2/E3) use DN 50 — DN 100 spindle adapter 5008748.

\*\* When using an E2/E3 extension spindle (9000E2/E3 / 9500E2/E3) use DN 50 — DN 100 spindle adapter 5008752.

\*\*\* When using an E2/E3 extension spindle (9000E2/E3 / 9500E2/E3) use DN 150.

# Wastewater - Knife Gate Valve

## With loose flange

### Application example

This knife gate valve was specially built for the replacement of existing valves in wastewater pressure lines. Previously it was extremely time-consuming to replace such a gate valve (see application example above)!

This sewage gate valve is provided with loose flanges and can easily be installed in the free space created

Recommended approach:

1. Disassembly of the existing gate valve
2. Check the sealing surfaces of the counterflanges, clean if necessary
3. Reset loose flange and adapt the replacement gate valve to the free space
4. Set-up the loose flange and mount on counterflange

### Benefits

- No spreading apart of the flange required
- Highly time-saving compared to the installation of conventional gate valves
- Easier installation due to moving loose flange
- Integrated conical seal with sealing lips and flat gasket
- Restraint connection
- Single-handed tightening of the screws due to hexagonal recess

# Universal Pipe Saddle

## With integrated flange knife gate valve

No. 4807

### Design features

- For lateral drilling of wastewater lines made from cast iron, steel (AC pipes) under pressure (DN 150-500)
- Spindle lies outside the flow medium
- Reliable and leak-proof shut-off function by knife gate and O-ring seal
- Suitable for underground installation
- Bonnet can be replaced "under pressure"
- **Two straps** and an additional saddle seal are always required!

### Material | Technical features

- **All cast iron parts** made of ductile iron, epoxy powder coated
- **Spindle, knife gate** made of stainless steel
- One side with double strap connection, the other side with flange in accordance with EN 1092-2
- Max. operating pressure MOP (PN) 10
- Note: actuation by means of electric actuator on request
- Flange sized and drilled according to EN 1092-2 | PN 10 standard - other standards on request

### Suitable accessories

Handwheel:		No. 7800 <sup>+</sup>
Extension spindles:	rigid	No. 9000E2/E3
	telescopic	No. 9500E2/E3
Strap:		No. 3110
Saddle seal:		No. ND82

<sup>+</sup> check the spindle square „VK“

DN	MOP (PN)	A	H	L	Drill Ø max.	VK	Weight
80	10	200	590	245	75	14,8*	17,4

\* When using an E2 extension spindle (9000E2/E3 / 9500E2/E3) use DN 50 — DN 100 spindle adapter 5008748.

# Auxiliary Shut-off Flange

### Design features

- Shut-off adapter for combination with air release valves

### Material | Technical features

- **Housing** and **dirt cover** made of steel, epoxy powder-coated
- **Seals:** integrated O-ring seals
- **Threaded bolts** made of stainless steel
- Max. operating pressure MOP (PN) 16
- Flange drilled according to EN 1092-1 | PN 16 standard

### Suitable accessories

Saddle blade:

No. 8401

No. 3735

### Application example

DN	MOP (PN)	D	d	LK	H	B	L	T	Weight
80	16	200	80	160	88	138	50	38	6,90

# Knife Gate Valve

## With non-rising spindle

### Design features

- Tight on both sides
- Gate valve for various applications
- Strong gate valve construction ensuring high resistance to corrosion
- Operation by handwheel or optional electric drive – be sure to specify when ordering
- One-piece body for DN50 - DN200, above DN200 a two-piece body
- Face to face according to EN 558 GR 20
- Maximum operating pressure 10 bar or 6 bar (see table)

**Standard version:**  
with non-rising spindle

### Variants of execution:

- with a connection for an electric drive (cat. No. 3600EL)
- with connection to a pneumatic drive (catalog no. 3600PN)
- with a pneumatic drive (catalog no. 3600PM)

### Material | Technical features

- **Body:** grey cast iron, conforming to EN 1561, epoxy powder coated
- **Bearing:** DN50 - DN200: ductile cast iron, DN250 - DN400: grey cast iron
- **Knife plate:** Stainless steel
- **Spindle and columns:** Stainless steel
- **Hexagonal bolts:** Stainless steel
- **Spindle nut:** Bronze
- **Seals:** elastomer
- **Slip washer:** POM

### Suitable accessories

Handwheel: No. 7800  
Actuator: No. 9920  
Spindle extension: No. 7820

**Recommended solenoid valves according to the possibility of connection to air supply.**

**Types of valves depending on the application**

- Standard Namur solenoid valves VSNC, mounted directly on the actuator
- VUVS series universal solenoid valve assembled individually
- Manually actuated valves VHEF
- Valve terminal with multi-pin or fieldbus connection

**Basic types of solenoid valves:**

- located on the actuator
- located outside the drive
- integrated

**Functions of solenoid valves:**

- 5/2 monostable (single solenoid valve, spring return)
- 5/2 bistable (double solenoid valve)
- 5/3 mid-position pressurised

**Additional equipment:**

- Direct mount actuator sensors
- (SMT, CRSMT) - signaling of end positions or intermediate drives
- DADG adapter for mounting a Namur VSNC valve or position sensor directly on the DFPC actuators

# E2 Extension Spindle

## Rigid or telescopic

### Design features

- One extension spindle for several dimensions
- Protective cover with integrated locking mechanism
- No additional fixing (bolt/pin) necessary
- DN 50 to 200

Order No.	Version	Pipe cover (RD)	Dimensions/DN		
			50/65/80/100	125/150	200
9000E2/E3	rigid	1,00 m

RD\* = pipe cover

### Assembly E2 installation kit DN 50 - 200

## Design features

- For the ergonomic above-ground operation of shut-off valves buried in the ground or installed in manholes and valve chambers
- Standpipe and connecting flanges of stainless steel
- Connecting flange for fixing on support base DN 65 drilled to EN 1092
- Electric actuator see page C 1/2

## Material | Technical features

### Version with handwheel (No. 9894)

- The extended inner pipe made from galvanised steel allows quick and easy connection of the HAWAK-Pillar with the square rod of the spindle extension or extension spindle. The telescopic connection in the HAWAK-Pillar allows a generous tolerance when cutting the square rod to length
- **Spindle** made of stainless steel
- **Spindle bearing** made of POM
- **Wiper ring** made of elastomer
- Position indicator for monitoring of valve position
- Maintenance-free

### Version for electric actuator (No. 9895)

- Connecting flange for actuator according to EN ISO 5210 / DIN 3210

## Pillar No. 9894 No. 9895

No. 9894

No. 9895

Not included in scope of supply!

Order No.	Version	For valves of nominal widths / DN										
		50	65	80	100	125	150	200	250	300	350	400
9894	Equipped with handwheel and position indicator											
9895	Model with connection for electric actuator											

When ordering please specify the valve type and the nominal width

# Additional extension spindle

## Material | Technical features

# Actuator

## Design features

- In standard version 400 V, 50 Hz, three phase motor, easily adjustable limit switch, dual torque switch, signal output to control flasher, thermoswitch for motor protection, handwheel for emergency use.
- Connection according: EN ISO 5210 F10 / F14
- Shaft coupling: EN ISO 5210 B3
- Enclosure of actuator: IP 68
- Enclosure of switches: IP 66
- Variations from the standard version on request.

## Actuator No. 9920

Actuator control unit AUMA MATIC and AUMATIC on request

Knife Gate Valve		Actuator

350-400	22	1,5 min

Other closing times and versions on request!

### Please observe when ordering:

For the use of Hawle knife gate valves with built-in electric actuator, the following data must be made known when ordering:

1. Operating pressure
2. Installation location of the valve
3. Number of on/off control communications per 24 hours

# Automatic Air Valve

For wastewater, operating pressure of 0 – 16 bar

## Design features

- Direct automatic air inflow and release valve for wastewater
- Operates automatically
- Max. air release capacity: 440 m<sup>3</sup>/h
- Max. size of the opening: 480 mm<sup>2</sup>
- Sealing face is not in contact with the wastewater
- The two joints facilitate easy and excellent flushing at maintenance. The flushing water is introduced via the upper exhaust opening. Solids are flushed out via the ball valve connector
- All mechanical parts of corrosion resistant materials
- Flanges sized in accordance with EN 1092-1, drilled according to EN 1092-1 | PN 10 standard; EN 1092-1 | PN 16 DN 200 please specify on order - other standards on request
- Due to the direct operation the release of lots of air is possible, even under full working pressure
- Subsequent special functions on request:
  - only air release
  - Air release stop: for compressed air tested lines (see page D 1/3)
- Please take the direction and maintenance instructions into consideration

## Valve maintenance

Flow performance diagramm

# Automatic Air Valve

## With air release stop

### Design features

- An escape of the flushing air via the automatic air valve is not desired during compressed air flushing. For this reason Hawle has developed an air release which can be subsequently mounted on each valve or can be built into each set
- When a certain air release capacity is reached (continuously adjustable via the adjustment nut), the air release closes and the flushing air remains in the pipe, only a small amount of air escapes through the overflow hole. After the flushing process has finished, the pressure builds up via this overflow hole, the exhaust stop opens and the automatic air valve returns to normal operation. Through a damping element the taper closes with a time delay, i.e. the valve is not immediately triggered for each short-term air release process with large air release performance and closes
- The air release quantity through the overflow hole is infinitely adjustable by means of a perforated adjusting screw

### Air release stop No. 9862

Wastewater automatic air valve  
with air release stop

### Material | Technical features

- Medium: drinking water, wastewater
- Max. operating pressure MOP (PN) 16
- Material:  
**Body and sealing cone** made of POM  
**Axis, spring and adjusting nut** made of stainless steel  
**Sealing elements** made of elastomer
- Prevents the escape of flushing air during the compressed air flushing
- Can be mounted before installation or subsequently on Hawle automatic air valves
- Infinitely variable adjustment of the air flow for the closing process
- If no compressed air flushing is carried out, the valve works in the normal operating condition

Wastewater automatic air release  
valve with air release stop

# Automatic Air Valve

For wastewater, operating pressure 0 — 16 bar

## Design features

- Waterproof PE-chamber with shut-off valve, air valve and fitting for connection of a PE drainage line
- Self - actuating
- Seal seat is not in contact with the wastewater (air cushion)
- Two connectors for efficient flushing during maintenance work (upper connector = flushing water inlet)
- When using with compressed air flushing an additional air release stop is required

## Material | Technical features

- **Body** made of steel, epoxy powder-coated (alternatively in stainless steel version)
- **All mechanical parts** made of corrosion-resistant materials, **body** made of steel, epoxy powder-coated
- Max. air release capacity: 440 m<sup>3</sup> / h
- Flange sized and drilled according to EN 1092-2 | PN 16 other standards on request
- Max. operating pressure (PN) 0 — 16

## Suitable accessories

Manhole cover and ring: No. 2069  
Air release stop: No. 9862

## No. 9828 with flange

## Application example

Order No.	MOP (PN)	Flange DN	H	RD	B	Weight
9828	16	80	990	1,25	455	62,0
			1240	1,50		80,0

# Fittings for PE and PVC pipes

## Restraint, System 2000

### Design features

- Using a lip seal ring for sealing the pipe allows for easier insertion of the pipe into the System 2000 chamber
- The pipe restraining system is required for pushing the pipe and into the seal chamfer with an appropriate chamfer
- For PE pipes with thin walls (up to 3 mm wall thickness) and low internal pressure we recommend using a support liner
- Suitable for **PE pipes 80/100**, EN 12201, DIN 8074
- For **PVC pipes** according to EN ISO 1452-2

### Material | Technical features

- **Body and lock ring** made of ductile iron, epoxy powder coated
- **Grip ring** made of brass (from DN 300 bronze)
- **Hexagonal bolts** made of stainless steel
- **Lip seal ring** made of elastomer
- **Spacer bushes** made of PE

## System 2000

**Push socket for PE-** (PE 80/100, EN 12201, DIN 8074) **and PVC pipe** (EN ISO 1452-2) - absolutely restraint

### Flange No. 0400

equal and reduced  
with integrated flange seal  
DN 50 — 600

### Connector No. 0430

Ø Pipe 63 — 355

Ø Pipe 63 — 315

# Fittings for PE and PVC pipes

## Restraint, System 2000

### ASSEMBLY INSTRUCTIONS:

For flange adaptors:  
bolt the flange to the mating flange first

Chamfer the pipe -  
use lubricant No. 3443  
(see page L 3/1)  
Do not use oil!

Ø D	A	B
63 – 40	2,5	10
160 – 180	4,0	16
200 – 225	5,0	20
250 – 315	7,0	25
355 – 450	9,0	35
500 – 630	10,0	40

Push the pipe to the end of the socket

For PE pipes with thin walls ( $\geq$  SDR 21) and low internal pressure we recommend using a support liner

Tighten the lock ring bolts crosswise until lock ring is tight on bushes  
Max. tightening torque for lock ring see page K 3/1

### DISMANTLING INSTRUCTIONS:

Loosen and remove lock ring bolts

Twist and withdraw the pipe

### TENSILE TEST:

The following maximum tensile loads have been established

**Test data:** Hawle test laboratory tensile testing machine

HDPE-Pipe (PE 80) DIN 8074 - EN 12201 | PN 10

Data established by use of a support liner and under 0 bar internal pressure  
Room temperature: 23 °C

Speed of tensile test (mm/min.): 0.1 x the free pipe length (L)

The table shows the maximum end load capacity of a System 2000 connection, compared with the effective theoretical loads in a PE pipeline with 10 bar

A System 2000 connection provides a safety factor of **4 to 6 times!**

Ø pipe	Theoretical tensile load - (kN*) at 10 bar internal pressure	Max. tensile load (kN*) established in tests
63	3,15	20
75	4,42	28
90	6,37	38
110	9,50	56
125	12,27	63
140	15,40	66
160	20,10	98
180	25,45	130
200	31,40	145
225	39,80	153
250	49,10	233
280	61,60	215
315	77,80	270

\*1 kN = 100 kp

# Flange connections

## Restraint

### Design features

- For PE pipes according to EN 12201, DIN 8074
- Flanges sized in accordance with EN 1092-2, drilled according to EN 1092-2 | PN 10 standard; EN 1092-2 | PN 16 DN 200 please specify on order - other standards on request

### Material | Technical features

- **Seals** made of elastomer
- **All cast iron parts** made of ductile iron, epoxy powder coated
- Max. operating pressure MOP (PN) 16

# Hawle-Vario

The innovative flexible fitting, PN 10 | PN 16

## Design features

- Hawle VARIO is a flanged, telescopic fitting with integrated ball- and socket joint, permitting bending to all sides up to an angular deflection of 10 degrees
- Flange sized in accordance with EN 1092-2, drilled according to EN 1092-2 | PN 10 standard; EN 1092-2 | PN 16 DN 200 please specify on order - other standards on request
- Hawle-VARIO will be fixed in the installed position by means of a tension lock assembly
- Combines the function of an FF-piece, an adjustable elbow piece and a fitting and extension piece
- Hawle-VARIO saves time and has numerous application possibilities

## Material | Technical features

- **All cast iron parts** made of ductile iron, epoxy powder coated
- **Locking ring, bolts, nuts and washers** made of stainless steel
- **O-rings** made of elastomer
- **Tension lock** made of stainless steel

# Check valves

## Without lever and counterweight, PN 10 | PN 16

### Design features

- Reliable prevention of medium back flow by automatic mechanical closing of the non-return valve
- The disc opens automatically, if the medium flows in the direction indicated by the arrow on the valve body
- Face-to-face dimensions according to EN 558 GR 48
- Flanges sized in accordance with EN 1092-2, drilled according to EN 1092-2 | PN 10 standard; EN 1092-2 | PN 16 DN 200 Please specify on order; other standards on request
- Reduced weight, simple cleaning, fully corrosion free, optimised velocity, simple maintenance
- Min. opening pressure 0,03 bar
- Min. closing pressure 0,5 bar (tight)

No. 9831

### Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Disc** and **disc lever** made of elastomer/polyamide
- **Bolts** and **nuts** made of stainless steel
- **Disc gasket** made of elastomer
- **Shaft** made of polyamide

### Installation advice

- In general non-return valves are designed to be installed in horizontal pipe lines. An installation in sloping and vertical pipe lines is possible if the flow of the medium is upwards
- Direction of flow has to be according to the arrow indicated on the body. Axle of the disc shaft has to be fully horizontal

# HAKU - Saddle

With 45° ZAK 69 connector, for PE and PVC pipes

## Design features

- For drilling of PE/PVC pipelines
- Half shells are calibrated to the external pipe diameter
- Reliable sealing by double O-ring profile seal

## Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Seal** made of elastomer
- Max. operating pressure MOP (PN) 16

## Suitable accessories

Service valve ZAK 69:	No. 2616
Fitting ZAK 69:	No. 6160
ZAK adapter:	No. 5895
Drilling machine:	No. 5800

No. 5262

## Application example

Pipe o. d. Ø	MOP (PN)	Max. drill	Connection	A	B	C	Weight

# Haku Pipe Saddle

## With flanged outlet for PE and PVC pipes

### Design features

- For **PE pipes** according to EN 12201 and DIN 8074 (**SDR 7,4 and SDR 11**) for **PVC pipes** according to EN ISO 1452-2 (**SDR 13,5 and SDR 21**)
- Solid construction of ductile iron epoxy powder coated
- No deformation of the pipe
- The drilled hole is sealed by an O-ring inserted in the upper part of saddle
- The rubber linings are bonded to the lower part of saddle - this ensures positive positioning of saddle (only for d 110 to 315)
- For holes from d 355 to 630 pipes, special drilling machine is available from Hawle
- Flange sized and drilled according to EN 1092-2 | PN 16 other standards on request
- For PE pipes with protective layer, this must be removed prior to mounting the saddle

### Material | Technical features

- Saddle body** and **segments** made of ductile iron, epoxy powder coated
- O-ring seal in the bonnet** made of elastomer
- Rubber in the lower part** of the saddle made of elastomer
- Bolts** and **washers** made of stainless steel
- Nuts** (Molybdenum-coated) made of stainless steel

### Suitable accessories

# Haku - Saddle

With internal thread for PE and PVC pipes

## Design features

- For **PE pipes** according to EN 12201 and DIN 8074 and **PVC pipes** according to EN ISO 1452-2
- The HAKU seal is in full contact with the entire diameter of the PE or PVC pipe and is glued onto the saddle for ease of assembly
- Several concentric seals with increasing diameter surround the outlet, relieving pressure exerted upon the drill hole and protects it from deformation
- The protective layer on PE pipes should be removed prior to mounting the saddle

## Material | Technical features

- **Saddle body** made of ductile iron, epoxy powder coated
- **Seals** made of elastomer
- **Bolts** (Molybdenum-coated) and **washers** made of stainless steel
- **Corrosion protection ring** made of elastomer
- Max. operating pressure MOP (PN) 16

## Suitable accessories

Fittings see chapter J

# Haku Shut-off Saddle

## With internal thread for PE and PVC pipes

### Design features

- For **PE pipes** according to EN 12201 and DIN 8074 and **PVC pipes** according to EN ISO 1452-2
- For under pressure drilling
- Can be pressure tested from both directions
- The HAKU seal is in full contact with the entire diameter of the PE or PVC pipe and is glued into the saddle for ease of assembly
- In addition several concentric seals with increasing diameter surround the outlet thus relieving the pressure upon the drill hole and protecting it from deformation
- For PE pipes with protective layer, this must be removed prior to mounting the saddle

**No. 5310**

### Material | Technical features

- **Saddle body** made of ductile iron, epoxy powder coated
- **Seal** made of elastomer
- **Bolts** (Molybdenum-coated) and **washers** made of stainless steel
- **Seal cover** made of POM, with rubber seal, glass fiber reinforced
- **Bolts** and **washers** made of stainless steel
- **Corrosion protection ring** made of elastomer
- Max. operating pressure MOP (PN) 16

# Universal Shut-off Saddle

## With flanged outlet

### Design features

- For drilling of cast, steel and AZ pipes under pressure (nominal diameter DN 150-500)
- Shut-off through saddle blade
- Two straps and an additional saddle seal are always required!
- Max. drilling diameter: 75 mm

### Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Seal** made of elastomer
- Flange sized and drilled according to EN 1092-2 | PN 16 other standards on request
- Max. operating pressure MOP (PN) 16

### Suitable accessories

Strap:	No. 3110
Saddle seal:	No. ND82
Saddle blade:	No. 8401
Drilling machines:	No. 5807

No. 3820

Flange DN	MOP (PN)	A	B	C	Weight
80	16	200	185	245	14,00

### Application example

With drilling device and X flange

The illustration shows the Universal shut-off saddle, mounted on a pipeline with two straps and attached automatic air valve assembly!

## Design features

- Strap for universal shut-off saddle No. 3820 and universal pipe saddle with integrated flanged knife gate valve No. 4807
- For the nominal diameter DN 65 to DN 500 (max. Ø 535 mm) - Special lengths on request!
- Particularly wide version of 65 mm, thereby lowest surface pressure on pipe - standard version for all pipe types
- Tightening torque max. 100 Nm

## Material | Technical features

- **Threaded bolts** made of stainless steel
- **Nuts** made of stainless steel
- **Clamping jaws** made of glass fibre reinforced polyamide
- **Bracket plate** made of stainless steel incl. rubber strap insulation

Pipe exterior Ø	Cast pipe - DN	Weight
75 — 83	65	0,73
98 — 105	80	0,69
112 — 122	100	0,79
139 — 149	125	0,81
166 — 177	150	0,88
216 — 227	200	1,01
268 — 280	250	1,17
323 — 330	300	1,36

## Strap No. 3110

## Design features

- Strap for universal shut-off saddle No. 3820 and universal pipe saddle with integrated flanged knife gate valve No. 4807
- For cast, steel and AZ pipes
- Two straps are always required
- Max. drilling diameter: 70 mm
- The saddle seal is equivalent to the corresponding pipe diameter of the pipe saddle and ensures error-free sealing function

## Material | Technical features

- **Material** made of elastomer

Pipe DN	Weight
125 — 150	0,050
200 — 300	0,050
350 — 500	0,064

## Saddle seal No. ND82

# Pipe repair clamp

## For steel, ductile iron and asbestos cement pipes

### Design features

- The clamp with the self-centering lug system
- Fully encompassing gasket seals complete gaps and other pipe damage
- The bolts (3) are welded to the bolt bar (4). Squeezing the handle makes for easy assembly onto the pipe. The nuts are fed directly to the bolts from a special nut dispenser (8). This eases the positioning of the lugs and bolts and avoids handling of loose parts.
- Special version such as larger diameters and other lengths on request
- **No. 0750** tested with new pipes in delivery condition  
 $\varnothing 54 - \varnothing 190$  PN 16  
 $\varnothing 190 - \varnothing 430$  PN 10
- **No. 0751** tested with new pipes in delivery condition  
 $\varnothing 87 - \varnothing 186$  PN 16  
 $\varnothing 208 - \varnothing 430$  PN 10  
 $\varnothing 425 - \varnothing 471$  PN 6  
 $\varnothing 472 - \varnothing 550$  PN 5

### Material | Technical features

- 1 **Band** made of stainless steel
- 2 **Lug** made of stainless steel
- 3 **Bolts** made of stainless steel
- 4 **Bolt-bar** made of stainless steel
- 5 **Bridging plate** made of stainless steel
- 6 **Gasket** made of elastomer
- 7 **Handle** made of stainless steel
- 8 **Nut dispenser** made of elastomer (from 3 bolts)

### Design features

- For steel, ductile iron and AC pipes
- For pipe diameters from 21 — 64, length 76

### Material | Technical features

- 1 **Band** made of stainless steel
- 2 **Gasket** made of elastomer
- 3 **Lug** bridge of galvanised iron
- 4 **Bolts** galvanised
- 5 **Nuts** galvanised
- 6 **Washers** made of stainless steel

## No. 0750 "single lug"

Pipe diameter 54 — 430, length 150 — 380

## No. 0751 "double lug"

Pipe diameter 87 — 471, length 200 — 380

Quick assembly with H-Nut dispenser which prevents loss of nuts into the dirty trench.

### Application examples

## No. 0501 "single lug"

# Pipe repair clamp

For steel, ductile iron and asbestos cement pipes

## No. 0750 single lug

# Service Valve

## With knife gate and ISO-fitting for PE pipes

### Design features

- The ideal gate valve for wastewater house connection lines
- Spindle lies outside the flow medium
- Reliable and leak-proof shut-off function by knife gate and O-ring seal
- Suitable for underground installation
- Double-sided restraint ISO-fitting connection for PE pipes
- Bonnet can be replaced „under pressure“

### Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Spindle** and **knife gate** made of stainless steel
- **Grip ring:** PE pipe - POM (Standard)  
PVC pipe - corundum PVC (aon request)
- Max. operating pressure MOP (PN) 10

### Suitable accessories

Handwheel:		No. 7800
Extension spindles:	rigid	No. 9101
	telescopic	No. 9601

No. 2615

### Application example

# Service Valve

With knife gate and zak 69 socket and spigot

## Design features

- Service valve for house connection lines with ZAK system
- Spindle lies outside the flow medium
- Reliable and leak-proof shut-off function by knife gate and O-ring seal
- Suitable for underground installation
- Bonnet can be replaced „under pressure“
- 100% corrosion protection
- Max. drilling diameter: 50 mm

## Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Spindle** and **knife gate** made of stainless steel
- Sleeve/spigot: ZAK 69
- Max. operating pressure MOP (PN) 10

## Suitable accessories

Handwheel: No. 7800  
 Extension spindles: rigid No. 9101  
                                   telescopic No. 9601  
 Drilling set ZAK 69 and cup drill see chapter K

No. 2616

Spigot / Socket	MOP (PN)	H	L	VK	Weight
ZAK 69	10	203	146,5	10,3	4,40

## Application example

# Service valve

## Made of POM with Hawle-FIT sockets

### Design features

- Resilient seated gate valve with smooth straight-through bore
- For PE pipes according to EN 12201 and DIN 8074 | up to PN 16; up to 30 °C medium temperature
- The high-tensile connection to the pipe is achieved via the two Hawle-FIT sockets
- Assembly-ready supply: no screwing required before inserting the pipe
- All parts made of corrosion free materials
- Maximum spindle torque: 80 Nm
- Easy disassembly without special tools
- Sealing system: the contact between wedge and body is friction free. Therefore no scuffing or abrasion of the wedge
- Hawle FIT socket details see page J 1/1

**Standard version:** without handwheel and extension spindle

**Special versions:** on request

### Material | Technical features

- 1 **Clamping nut** made of POM
- 2 **Lip seal** made of elastomer
- 3 **Grip ring** made of POM

### Suitable accessories

Handwheel:		No. 7800
Extension spindles:	rigid	No. 9101
	telescopic	No. 9601
Support liners:		No. 6021
Hawle-FIT type for reducer:		No. 6640HFA

No. 2631

Order No.	Version	MOP (PN)	Dimensions/DN			
			1"	1¼"	1½"	2"
2631	With Hawle-FIT socket	16				

PE 80: SDR 7,4 - SDR 17,6

PE 100: SDR 11 - SDR 17

For PE 80 and PE 100: SDR 17,6 and 17 we recommend using a support liner

### Design features

- For the reduction of Hawle-FIT socket

## Hawle-FIT type for reducer

### No. 6640HFA

Order No.	Version	MOP (PN)	Dimensions/DN							
			32	40	40	50	50	63	63	
6640HFA	With Hawle-FIT socket	16	25	25	32	32	40	40	50	

# Service valve

## Made of POM with Hawle-FIT sockets

### Service valve, POM

With dual Hawle-Fit connections sockets for PE-pipes

**No. 2631**

DN	Ø pipe ext.	Valve				Spindle			Weight
		t	L	H	H1	a	c	Ø d1	
1"	32	84	216	177	212	10,3	20	16	1,05
1¼"	40	105	260	205	241				1,56
1½"	50	116	294	205	247				1,83
2"	63	123	306	228	278				2,47

#### Benefits of the Hawle-FIT sockets

- Ready to install from packaging
- Can be mounted without previous chamfering of the pipe ends
- Low insertion forces
- Defined stop of the clamping nut made of POM for a secure connection
- Easy assembly and disassembly without special tools  
(Clamping nut can be fixed with a standard commercially available pipe cutter)

#### Assembly instructions

Measuring the insertion depth

POM clamping nut open

Pom clamping nut fully tightened

# Flushing Valves

## Design features

- Lockable flushing valve for easy flushing of culvert or offset canals
- No complex chamber construction necessary, thus no high running costs for the maintenance of the chambers
- No hazards due to traversing the chambers
- Simple flushing due to free passage
- Upper outlet with closable storz C outlet
- Lower outlet: flange, straight
- Optionally with 2" external thread
- Compact construction, low build costs as no chamber construction
- Special lengths and other versions on request

## Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Seal** made of elastomer
- **Spindle and knife gate** made of stainless steel
- When open, knife gate is completely outside the medium (free passage)
- Flushing connection storz: C coupling (aluminium)
- With discharge on request

## Suitable accessories

- |   |          |
|---|----------|
| Valve key                               | No. 3420 |
| Standpipe for wastewater flushing valve | No. 9857 |

## Design features

- Special standpipe for fitting on flushing valves as an extension

## Material | Technical features

- **Standpipe and angle** made of galvanised steel 2"
- **Storz C coupling** made of aluminium
- **Ball valve** made of nickel-plated brass 2"
- Max. operating pressure MOP (PN) 16

## Application example

## Flushing valve with straight flange outlet No. 9858

9857	16	660	5,30

# Hawle-Fit

## Fittings for PE pipes

### Design features

- For PE pipes according to EN 12201-2 and DIN 8074, up to PN 16
- The new generation of fitting pipes Hawle-FIT has been designed to connect PE pipes with an outside diameter of d 25 to 63 and a working pressure of up to 16 bar
- The Hawle-FIT is designed for communal waste water applications within a temperature range of up to 30 °C
- Installation and dismantling is simply performed with no special tools required
- The service life of the Hawle-FIT is guaranteed by the use of high-quality polymer materials; the clamping nut as functional carrier is very stable through its unique construction
- The special clamp toothing (no continuous groove) reduces the impact force on the pipe. This significantly enhances the service life of the pipe
- The stainless steel reinforcing ring increases the strength of the fitting with internal thread outlets
- UV resistant

### Material | Technical features

- **Body** made of high-quality polymer
- **Grip rings and clamping unit** made of POM
- **Seal** made of elastomer

Open clamping nut

Clamping nut fully tightened

- The Hawle-FIT fitting is supplied ready for installation which means no turning of the screw is required before inserting the pipe! The fitting is unpacked and is then ready for use (ill. 1).
- The Hawle-FIT fitting can be assembled without any pipe chamfering. Push until reaching built-in end stops. This saves time and money (ill. 2/3).
- Prior to fastening the screw, the grip ring does not reveal any initial tension or teeth. For this reason only very low insertion forces are required
- The construction of the Hawle-FIT fitting amplifies the dismantling of the pipe since the fitting does not have to be completely dismantled. The clamping nut is loosened but not actually removed (ill. 4)

\* PE 80: SDR 7,4 - SDR 17,6  
 PE 100: SDR 11  
 PE 100: SDR 17  
 (support liner No. 6021 is required)

# Hawle-Fit

## Assembly and dismantling

- Instruction - Fittings / Valves
- For PE pipes Ø d 25 — d 63 up to PN 16

### HAWLE-FIT ASSEMBLY INSTRUCTIONS

Low pressure conditions require a support liner No. 6021

For PE pipes SDR 17, is required a support liner No. 6021

### HAWLE-FIT DISMANTLING

# Hawle-Fit

# ISO pipe fitting

## Fittings for PE pipes

### Design features

- For PE pipes according to EN 12201-2 and DIN 8074, up to PN 16
- The Hawle ISO pipe fitting is the easiest way joining PE pipes
- The ISO pipe fitting is suitable for use in communal waste water area up to a temperature of 30 °C
- The gripping and sealing functions act only the o.d. of the pipe; therefore only one fitting is required for all pressure ratings up to PN 16
- The function of the ISO pipe fitting is clear and simple; the O-ring is made of elastomer and seals well even when the pressure is nil, because it is compressed onto the pipe
- As the water pressure and pipe tension increase, the sealing and grip rings are compressed further into the conical chamber, thus increasing the sealing and gripping effect
- The joint is flexible and the fitting can be turned on the pipe without affecting the grip or seal. Assembly the fitting is quick and simple and can be dismantled if required.
- This design has been well proven for many years in waste water distribution and is used in pipelines with pressures up to PN 16 (also in vacuum situations, with support liner)
- All ductile iron fittings with internal threads are fitted with a corrosion protection ring to prevent corrosion
- For ductile iron fittings with external thread, after assembly the free lying threads must be protected against corrosion according to the trade regulations

### Made of ductile iron

Epoxy powder-coated

### Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Grip ring** made of POM
- **O-ring gasket** made of elastomer

### Suitable accessories

Chamfering tool:	No. 6000
Extractors:	No. 6010
Support liner:	No. 6021

All ISO pipe fittings can also be supplied for PVC pipes with a grip ring „2K” Order No. 6933 at extra cost.

Grip ring  
"Standard"  
Interlocking  
teeth

Grip ring  
„2K”

Grip ring

## Universal base plate No. 3481

## Design features

- Manhole cover and ring with opening for automatic air valve assembly, Order No. 9828
- Cover inscription „Abwasser“ and „Be- und Entlüftung“

## Design features

- **Shaft cover** made of ductile iron, bituminised
- **Shaft ring** made of grey iron, bituminised

## Manhole cover and ring for automatic air valve assembly No. 2069

# Pipe laying Equipment

## For PVC pipes, PN 10 | PN 16

### Design features

- 1254/1255: Anti-shear devices for PVC-U pipes, fittings and pipes according to EN ISO 1452-2
- This two-part body can be assembled onto an existing pipeline. If required it can be dismantled and reused
- The grip ring is self tightening within its tapered seating
- The design of the teeth avoids cutting into the pipe resulting in the highest gripping force without pipe damage
- Wedge fastening on both sides
- Hammer the wedges until the clamp is tightly closed

### Material | Technical features

- **Body** made of ductile iron, epoxy powder coated
- **Grip ring** made of brass
- **Wedge fastener** made of ductile iron, galvanised epoxy powder coated

## Design features

- For an easy installation
- Made of pure silicon (with a special solvent)
- Suitable for potable water
- Content: 400 ml
- **Attention:** observe the safety-instruction label on the can

## Mounting spray For PE and PVC pipes No. 3443

## Design features

- Suitable for valves, spindles and O-rings
- Content: 90 g

## Fitting grease No. 3444

# Conditions of Sale 2019

## Last updated January 2019 / valid as of 01.01.2019

### 1 General

1.1 All offers, sales transactions, deliveries and other services provided by E. Hawle Armaturenwerke GmbH (henceforth referred to as „Hawle“) to our customers as of 01.01.2019 are subject exclusively to the following Conditions of Sale.

1.2 Hawle shall not recognise any conflicting or deviating terms and conditions of the customer unless Hawle has expressly agreed to their validity in writing.

1.3 Supplements and amendments to these Conditions of Sale as well as ancillary agreements must be made in writing in order to be effective. This also applies to the waiver of the written form requirement.

1.4 In the event that individual provisions of these Conditions of Sale are or become invalid, the remaining provisions shall remain effective. Ineffective provisions shall automatically be replaced by legally effective provisions which come as close as possible to the economic intent of the contracting parties.

1.5 It is the responsibility of the customer to assess the technical and legal suitability of the goods offered by Hawle for the use intended by the customer or his buyers. The customer is also required to observe export and import restrictions.

1.6 Any administrative authorisations required for the import of goods into their country of destination or for the use intended by the customer or his buyers must be obtained by the customer in good time. In the event that such authorisations are not obtained in good time, delivery dates and periods shall be extended accordingly.

1.7 Hawle reserves the property rights and copyrights to the product catalogue sheets, drawings, product photos, cost estimates and other documents prepared by Hawle. These documents may not be disclosed to third parties without the prior permission of Hawle.

### 2 Conclusion of contract

2.1 All offers and price lists issued by Hawle are subject to change and non-binding, unless expressly agreed otherwise, and only become binding once Hawle has confirmed the order in writing or performed an action set by Hawle in fulfilment of the contract (e.g. delivery/shipment of the goods).

2.2 Following the confirmation of the order or the performance of an action in fulfilment of the contract by Hawle, the customer may withdraw from the contract only with the prior written consent of Hawle. Unilateral withdrawal from the contract on the part of the customer is not permitted.

### 3 Prices and terms of payment

3.1 All documents pertaining to an offer such as drawings, illustrations and weight specifications shall only be regarded as approximate unless they are expressly designated as being binding. This reservation applies in particular to obvious errors, typographical errors, printing errors and miscalculations.

3.2 Unless otherwise agreed, the prices quoted by Hawle are in EURO Ex Works Frankenmarkt (EXW, Incoterms 2010), excluding in particular packaging, transport costs, transport insurance, sales tax and export and import duties. Packaging, loading, transport costs and transport insurance as well as potential taxes and duties shall be invoiced separately by Hawle.

3.3 Any changes in wage costs due to collective or statutory regulations or internal agreements as well as changes in other costs relevant to the calculation of costs necessary for the provision of the service, such as the costs incurred for materials, energy, transport, third-party work, financing, etc., shall entitle Hawle to increase the prices accordingly. For this reason, the customer shall have neither the right to withdraw from the contract nor the right to assert that the basis of the transaction has ceased to exist. Orders confirmed by Hawle are exempt from potential price changes.

3.4 Unless otherwise agreed, net payment must be made by the customer within 30 days from the date of invoice. Payments will be offset against the oldest claim due in each respective case.

3.5 The possibility of offsetting payments against claims made by Hawle is excluded.

3.6 In the event that the customer defaults on payment, Hawle shall be released from all further service and delivery obligations and be entitled to withhold any outstanding deliveries or services or to demand advance payments or guarantees.

3.7 In the event that, upon conclusion of the contract, a significant deterioration in the financial circumstances of the customer occurs, or if circumstances become known which from Hawle's point of view are likely to reduce the creditworthiness of the customer, Hawle shall have the right to change due dates for outstanding claims, withhold deliveries to the customer and adjust conditions for future legal transactions with immediate effect.

### 4 Delivery

4.1 Orders confirmed by Hawle shall be fulfilled by Hawle as swiftly and diligently as possible. The delivery dates and periods announced by Hawle are merely intended to serve as a guideline and are always non-binding unless the stated delivery dates and periods have been expressly designated as binding by Hawle.

4.2 In the event of force majeure or any unforeseeable obstacle for which Hawle is not responsible, delivery dates and deadlines shall be reasonably extended by the duration of the impediment. This shall also apply if Hawle's sub-suppliers encounter such impediments. These include, in particular, official measures, strikes and lock-outs, natural disasters, market-related problems with material procurement as well as import and export restrictions.

4.3 Hawle deliveries may always be divided into sub-deliveries. Hawle is at liberty to make partial deliveries or provide partial services and to issue partial invoices to the customer.

4.4 National and international goods traffic is subject to the terms of delivery FCA, 4890 Frankenmarkt, Hawle dispatch warehouse (Incoterms 2010), unless another delivery clause has been explicitly agreed.

4.5 In the case of a sales shipment, the transfer of risk takes place once the purchased item has been handed over to the first carrier. Where acceptance of a service is required, Hawle's notification of readiness for acceptance shall be decisive for the transfer of risk.

4.6 The customer is obliged to accept the deliveries and services provided by Hawle as per contract. In the event of default of acceptance or a culpable breach of other obligations to cooperate on the part of the customer, Hawle is entitled to demand compensation from the customer for any damage incurred as a result, including any additional expenses.

# Conditions of Sale 2019

Last updated January 2019 / valid as of 01.01.2019

4.7 Hawle is entitled to make changes to the technical design of the goods ordered, provided that these do not result in significant functional changes and the customer does not demonstrate the unreasonable nature of such changes. Unreasonableness is to be ruled out if the change constitutes a technical improvement or is caused by the further development of the state of the art or by legal or official measures.

4.8 In principle, the customer is not entitled to refunds or replacements. Refunds and replacements are only possible in exceptional cases and require the prior written consent of Hawle.

4.9 The goods delivered by Hawle to the customer are intended for use or resale in the customer's country of residence or in the country of the place of delivery.

## 5 Reservation of title

5.1 All goods delivered by Hawle remain the property of Hawle until payment has been made in full.

5.2 The customer is authorised to resell the goods in the regular course of business, even during the period in which the goods are subject to reservation of title. If, however, the customer is in default of payment to Hawle, Hawle may prohibit the resale of the goods subject to reservation of title.

5.3 The customer herewith cedes to Hawle all purchase price claims, including all ancillary rights, arising from a resale of the goods to his customers. Hawle accepts this assignment. These purchase price claims serve as security for the goods subject to retention of title.

## 6 Warranty

6.1 The customer must inspect the received goods with respect to quantity and quality immediately upon receipt. Written notices of defects must be submitted by the customer immediately after receipt of the delivery, but at the latest within 10 days from the date of delivery and prior to any handling or processing, otherwise excluding any warranty claims and/or claims for damages and/or avoidance on account of mistake, but do not entitle the customer to retain the invoiced amounts or portions thereof.

6.2 The warranty period for defects which were not detected during the inspection of the shipment is six months from the date of delivery and is neither extended nor interrupted by attempts at improvement; it also applies to partial deliveries. Notification of any such defects must be given in writing within 10 days from the date the defect was discovered, otherwise excluding warranty claims and/or claims for damages and/or avoidance on account of mistake, but do not entitle the customer to retain the invoiced amounts or portions thereof.

6.3 It has been agreed between Hawle and the customer that a hydrostatic pressure test in accordance with EN 805 is to be performed after laying a pipeline but prior to the main backfilling of the pipe trench or further constructional measures in shafts, plants or buildings which restrict accessibility to the valves and pipe fittings. If such a test is not performed, the customer or his customers shall be charged with contributory negligence of at least 50% in the event of damage. The customer agrees to inform his customers accordingly and to pass on this obligation to perform the described hydrostatic pressure test to his customers.

6.4 Possible warranty obligations generally cover the defective goods, but not the expenses otherwise associated with correcting the defect such as excavation costs, working hours and travel expenses.

6.5 The customer always bears the burden of proving that the delivered goods were defective at the time of delivery.

6.6 The place of performance for warranty obligations is always the place of delivery agreed for the original delivery.

6.7 Hawle shall be free to decide whether to fulfil possible warranty claims by means of replacements, improvement measures, price reductions or conversions.

## 7 Damages and liability

7.1 Any consulting provided by Hawle, whether verbal or in writing, is non-binding and does not release the customer from his obligation to examine the goods with respect to their suitability and the intended purpose. This applies above all, but not exclusively, to the suitability of the goods for the use intended by the customer or his customers, in particular to their suitability for the substances (gases and/or liquids) to be conveyed.

7.2 Hawle shall be liable for damages caused to the customer in the course of processing the business transaction in an amount not exceeding the value of the order placed with Hawle, and only in the event of gross negligence on the part of Hawle or gross negligence on the part of the executors working for Hawle, with the exception of personal injuries in which case Hawle shall be liable even in the event of minor negligence. The burden of proving gross negligence always lies with the injured party.

7.3 IN NO EVENT SHALL Hawle BE HELD LIABLE, WHETHER IN TORT OR CONTRACT, FOR INDIRECT DAMAGES, CONSEQUENTIAL DAMAGES, PURELY PECUNIARY LOSSES, FOREGONE PROFITS OR DAMAGES ARISING FROM DELAYS OR OUT OF THIRD PARTY CLAIMS.

7.4 The time limit for asserting claims for damages is one year from the date on which the customer gains knowledge of, or is subject to, negligent ignorance of the damage and the injuring party.

7.5 In the event that the customer himself is held liable under product liability law, he undertakes to immediately notify Hawle thereof by telephone or in writing and to immediately inform Hawle of the address of the claimant, failing which the customer's right of recourse against Hawle arising from product liability will cease to apply. Negotiations of claims arising from product liability with respect to Hawle products shall be conducted exclusively by Hawle.

## 8 Place of performance, court of jurisdiction, applicable law

8.1 The place of performance for both delivery and payment is always 4840 Vöcklabruck/Austria, even if a different place of delivery has been agreed individually.

8.2 The exclusive court of jurisdiction for all disputes arising from legal transactions between the customer and Hawle is the competent court in 4840 Vöcklabruck/Austria. Moreover, Hawle is also entitled to sue at the customer's registered office.

8.3 All legal transactions between the customer and Hawle are subject exclusively to Austrian substantive law, excluding international conflict of law rules. The application of the UN Convention on Contracts for the International Sale of Goods (CISG) is explicitly excluded.
