

Sustainable digitalization in drinking water supply

Hawle.live BOX

Reliable & energy self-sufficient remote monitoring - simply smart!

Hawle.live CAP

Smart remote monitoring of hydrants

Hawle.live APP

Innovative online platform for all your products

H4.live

Digital hydrant for real-time monitoring

Our Hawle.live products support our customers in the digitalization of their water supply and in saving costs. In doing so, we set great store by efficiency, sustainability, and top quality.

We use the central Hawle.live APP to integrate monitoring systems for hydrants, filling levels, water meters, door contacts, water pressures, and many other applications into your water supply network.

From the source to the home.

Our products are used in water infrastructure, which is why the highest standards of quality and longevity are so important.

We Live and Breathe Quality.

At Hawle, quality is not just about the exceptional nature of the products themselves.

For us, it means so much more:

- We set especially high standards for ourselves when it comes to ensuring that our customers are happy. It is not just about winning new customers, but also about providing them with the best possible support and thereby establishing long-term partnerships.
- Our quality starts with the recruitment of employees, and continues with the methods we use, as well as our innovations and the development and production of our long-lasting products right up to the moment they are ready for series manufacturing.
- Hawle has more than 150 product certificates and around 300 material licenses in various countries. In order to ensure product quality, our testing department subjects the raw materials to extensive tests - starting as early as the development stage.

Coming soon H4.LIVE hydrant

made for generations.

H4.LIVE hydrant

alarm if
opened/closed

warning if a
hydrant has been
knocked down

documentation
of all actuations

alarm at
unauthorized
water withdrawel

reduction
of frost damage

minimizing the
default risk

The digital H4.live hydrant notifies you of any actuation of the hydrant. You get real-time data and can obtain information about the activities and the condition of your H4.live hydrant anytime and anywhere. Due to this continuous monitoring, you are always up to date and get valuable details for your daily routines.

Administration is performed via the Hawle.live APP, where each H4.live hydrant is installed with its GPS data. This visualization allows not only a perfect overview but also the related documentation of all activities.

By means of the alert plan, immediate notification via SMS and/or e-mail can be configured.
